ドイツ軍大陸横断超大型爆撃機ホルテン H.18

ホルテン H.18 は、第二次世界大戦中にドイツ軍が開発した、大陸横断超大型爆撃機である。全翼型の機体形状もありステルス性も備えていた。その基本設計はHo229の拡大版で、迎撃機としての設計であったが、爆撃機として設計変更する過程において繰り返し修正を受け最適化され、最初に完成した XVIII.A 型は与圧装置を備え、搭乗員 3 名、搭載エンジンとしてユンカース ユモ 004 を 6 発装備、マッハ 0.75 で飛行可能であり、また機体上部に 2 連装の MG 151 機関砲塔を装備していた。

ヨーロッパ戦線で局地的に投入され、その実績をもとに数々のバリエーションが派生した。

最終的に大陸横断爆撃機として大幅な改良を受けた後、1946 年にアメリカ本土のニューヨーク島爆撃作戦を完遂。さらに他都市爆撃任務に就いた全 18 機はすべてドイツまで無事帰還を成し遂げている。

また、日本海軍の遣独潜水艦により、部品および図面、技術者が本土に届けられ、「Z 計画」が本格的に始動されることとなった。

Horten H.XVIII A Super Long-Range Strategic Bomber

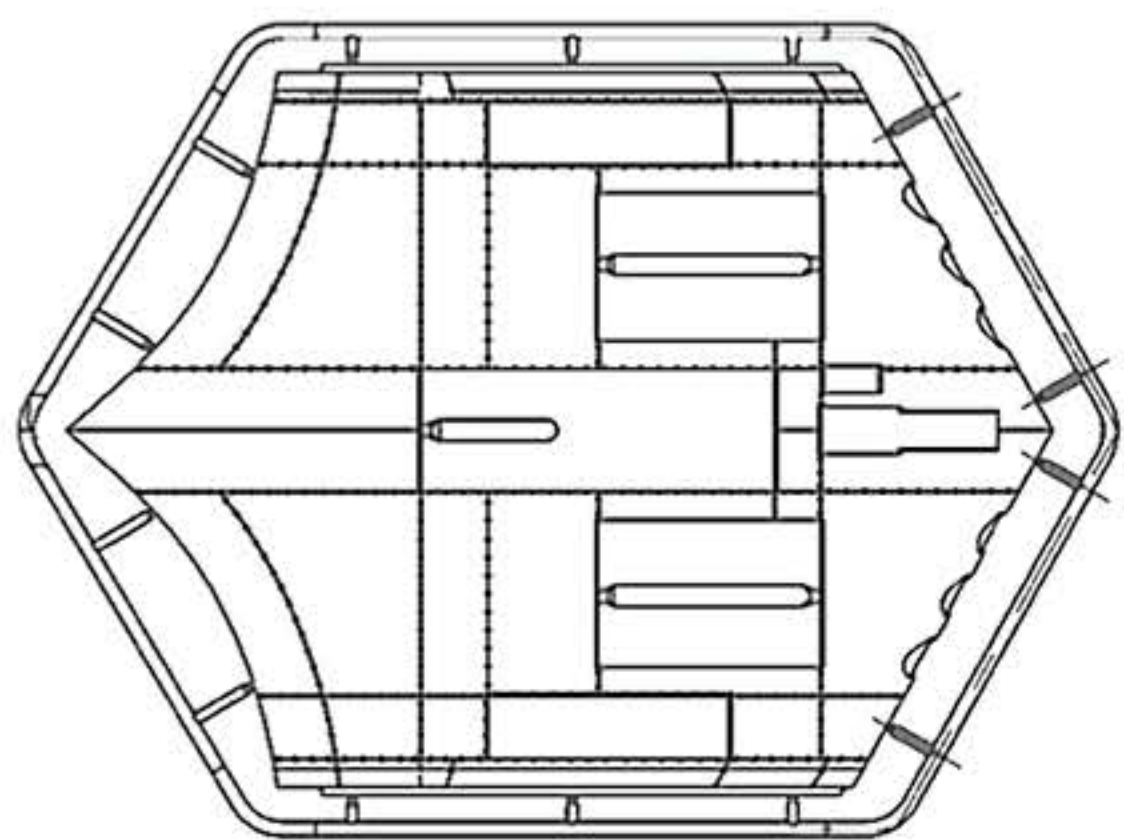

The Horten H.XVIII was a German World War II intercontinental bomber, which in many respects, a scaled-up version of the Horten Ho 229. It was one of the many proposed designs for an Amerikabomber.

The most aircrafts in the early stage of the productions were deployed widely to European theaters, equipped with those several state-of-art bombs and guided missiles, such as smart anti-ground, anti-vessels guided, Anti-air loadout. It made it through each variety of missions, and made a significant results to brings dramatical changes in the front lines.

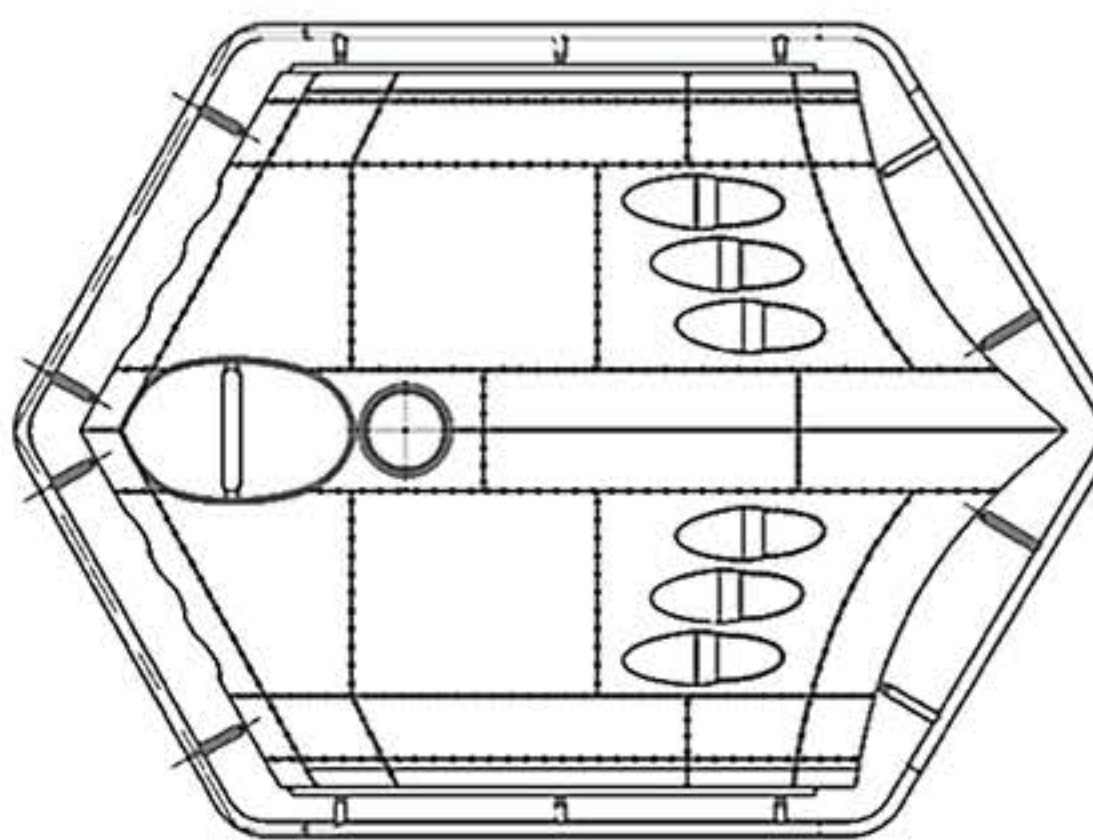

This bomber was updated carrying sufficient fuel for transatlantic flights in 1944 and bomb load weight, thus 18 bombers were deployed intercontinentally to USA mainland in September 1946, bomb-raid on New York, Nevada and New Mexico, to prevent atomic bomb development.
